

MINES AND MINING STOCKS = FINANCIAL AND COMMERCIAL

GOOD REPORTS ON MAJESTIC

Shown Where More Than \$500,000 Has Gone.

THE KIND OF ORE SHIPPED

CARISA HAS 20,000 TONS OF ORE BLOCKED OUT.

Through Chapman, Mucklow & Bosson, fiscal agents of the company, the shareholders of the Majestic Copper Mining & Smelting company are now being supplied with reports and statements which, for detailed information and comprehensiveness have never be-fore been equaled. What is better still, they show by facts and figures that the company's properties are exceedingly valuable and that (as always contended, properly managed, they could be made to earn handsome

Included in the letter to stockholders is a statement showing that in August, 1902, over 120 mining claims were conveyed to the company clear of that over \$500,000 has been expended by the company, as follows:

Mining claims purchased\$ 20,000 00 Cost of general equipment of the O. K., Old Hickory, Harring-ton-Hickory, and Vicksburg mines 50'952 15 mines Railroad spur from Old Hick-Cost of smelters complete
Reservoir, stores, stables, boarding and bunk houses, black-

58,892 59

Total\$548,430 82 Last spring, when the affairs of the company became so entangled that creditors jumped in and had receivers appointed and when it became apparent that there was a move on foot to secure the property for other interests and deprive the old shareholders of the mines which had cost them dearly. W. B. Mucklow and other stockholders formed a defense committee and, with the assistance of 700 of the stockholders, raised the necessary moneys to effect a settlement with creditors and reclaim the mines, as well as provide for a resumption of operations.

Kind of Ore Shipped.

On the 15th of July Ed F. Freudenthal was placed in temporary charge of the properties and instructed to employ a moderate force and proceed with the development of the O. K., Old Hickory and Harrington-Hickory mines. Not long thereafter he had the properties in such shape that he was prepared to market ore. For the purpose of show-ing what might be done in the open market with ores just as they came from the mine workings he shipped two cars from each of the properties named. After all charges were deducted (freight, treatment, assaying, etc.), the company received, net, \$1,104, or \$20.44 per ton for the two cars (fifty-

It is the expressed intention of the company to ship only enough ore from now on to show that it has it to ship, the idea being to go on developing until next spring, when it is expected to have everything in shape for the continuous operation of the smelter. Superintendent Freudenthal's report shows all the mines to be in fine con-

dition, with new ore bodies constantly being uncovered.

The indebtedness of the company is approximately \$200,000, the large bulk of which is owing to shareholders who previously advanced the money and who have agreed to accept the company's bonds in payment. In addition to cleaning up this account, it is proposed to sell \$200,000 worth more of he bonds in order that the mines may be perfectly opened and the proposi-tion placed on a dividend-earning ba-sis. The statements and reports submitted indicate that the amount name will be amply sufficient.

JOHN A. KIRBY RESIGNS.

Will Serve Daly-West in Consulting Capacity Only, Now.

Capacity Unity, Now.

At the meeting of the directors of the tity-West company Tuescay afternoon or resignation of John A. Kirby as genal superintendent of the company's opetities was formally accepted, though was not allowed to sever his connector with the company entirely. Hereter he will serve as consulting engineer, at while the change will permit him to be more attention to matters of a resonal nature and allow him to spend our time in the field in the interests of a Bambergers and other mining operates with whom he is associated, he will my's mines, J. A. McCaskell, who has en serving as assistant superintendent r many months past, and who has thorself years and who has thorself years are made as mine superintendent. The change will in no way instruct with the perfect operation of the operity, for, as Mr. Kirby nimself stated evious to his departure for Tonopah, e physical characteristics of the mine e now thoroughly understood. The stem of mining and development is chitat there is no possibility of those charge of the mine going astray. On at account, he felt that he could ask r his liberty without in any manner opardizing the interests of the company.

fr. Kirby left for Tonopah and Gold-dyesterday morning. He was accom-nied by General Manager J. E. Bam-ger, who is going on to the coast, and o later will possibly join Mr. Kirby in vada, where it is understood they have siness of more than passing interest to k after. It is possible that Mr. Kirby i remain in the field for several weeks, tially on his own account and par-sly in the interests of some of his Sait accessoriates.

CARISA ORE BODIES.

On 700 Level 20,000 Tons Ready to

Market. On his return from the Carisa yesterday morning Manager H. S. Joseph stated that the tunnel connecting with the ore bodies on the '00-foot level of the property, the completion of which was inneunced a few days ago, had all been straightened, track had been laid and everything was practically ready for the beginning of production. Receiving bins at the mouth of the Sloux tunnel, with which the avenue into Carisa ground is connected need only the roof to make them complete, and it is now possible to use them at any time. A sour on the Mammoth 'high line' of railroad is being put in that will reduce the length of the wagon haul from three to one mile, and with that completed Superintendent George Norman will get the signal to cut loose.

For a long time, now, the Carisa company has been steadily developing on the 70 level, and it is now estimated that there is all of 20,000 tons of copper-gold

pany, after the expense of mining. In the drift on the bottom level, where frieight, treatment, assaying and other fixed charges are deducted, approximately \$4 per ton. This result will be attained. Manager Joseph says, by taking the ore just as it is broken down in the mine. There is not a little high-grade ore mixed with the ordinary grade, but unless it makes in quantity sufficient to make its mining separately particularly desirable.

Ining the drift on the bottom level, where the recent strike as made. While the management still refrains from discussing the merits of the strike in detail, it is said that the showing is a splendid one, and everything indicates that much is to be expected from it. Another consignment of ore will be marketed during the next few days.

with the ordinary grade, but unless it makes in quantity sufficient to make its mining separately particularly desirable. No sorting will be attempted. The shoot is a tremendously large one, and on that account it is figured that more money can be made by breaking a large tonnage than by exercising care in separating the different grades.

A great mass of the ore is already broken down, and rather than do expensive timbering, the aim will be to keep the pile standing in order that the stopers can work up from it. To begin with, it is expected that about a carload of ore per day will be taken out for shipment. By and by, as the work of mining progresses, the amount will be increased to probably 100 tons per day, or as much as the smelters will agree to take.

In addition to the tonnage that will come from these workings, the usual consignments of high-grade from the old workings under lease will, of course, be made, and the probabilities are that explorations below in new territory will soon be heard from in a substantial manner, as well. The outlook for the property is now considered better than it has been for many years, and it will not be long till the treasury will boast a surplus.

MINING NEAR FARMINGTON.

few miles north of this city, 's to be operated by a Kentucky combination at the head of which is D. Sam White, J. S. Wallingford and C. R. White. The property is a gold-copper proposition, and an expert by the name of Perkins has, according to the Davis County Argus, just completed an exhaustive examination of the ground and compiled a report upon it in the interests of the Kentucky crowd. A tunnel has been driven toward the ledge a distance of 100 feet already, and the showing made in the surface workings has been such that the new owners feel justified in sending it along for another 1,000 feet, by which time a vertical depth approximating 500 feet on the vein will have been obtained.

It is understood that the property will be equipped with a compressor and power drill plant and a good force of men will be kept constantly at work developing the ground. Expert Perkins is to exercise a supervisory control of operations, while John Hueselton will be mine foreman. Just as soon as supplies can be gotten on the ground three shifts yill be put to work in the tunnel.

It is believed that several smaller ledges carrying gold and copper ore will be cut in this tunnel before the large of main ledge is reached. This group of claims was originally located by Messrs. Hartman and Whipple, and these gentlemen still retain an interest in it. There is an abundance of good water on the property for all necessary purposes.

Adjoining the Farmington group on both sides there is some very valuable property and it is all located. In fact all the property in the vicinity is owned by different local parties who have done considerable work on their claims—as much as their means would allow. The district immediately adjacent to Farmington is more the field of the capitalist than the prospector, although the latter will probably find many things of interest to him a little way up one of the neighboring canyons.

Nearly \$2,000. The last two cars of ore shipped by the May Day company were sold vesterday. They netted the company \$1.906, or \$953 a car. The figures indicate that Manager Darmer's statement that he would be well pleased if the shipments from the mine would net the company \$600 to \$700 per car. were more than conservative. This settlement shows, also that the ore was coming cleaner than in the beginning, though it was also produced in runfloor Commercial Block.

Davis County Argus: With oil wells on less low lands and paying mines in the lis. Farmington with her farms between till be a pretty lively place. Because all is is probable there is no occasion to texcited and neglect the farm; for he ho tickles the face of nature with a hoe more sure of his reward than he who acks and splits her with blast and ill.

Our treasury balances. St. Paul's final price for the day was 1½ higher than last night, and only a remnant of the day's important gains showed at the closing, which was irregular. Many prominent active stocks ended the day lower than last night.

Bonds were irregular. Total sales, par value, \$4,760,000. U. S. 3s declined 1/4 per cent on call.

Miles Finlen, the well known Butte op-erator, who is largely interested in Utah mining propositions, came down from the north on one of his periodical visits yes-terday morning.

Five cars of ore from Tintic and five from Bingham were reported at the Tay-lor & Brunton sampler yesterday morn-Four cars of high-grade lead-silver-gold ore from the Bingham-New Haven company's properties were on the market yesterday.

yesterday,
General Manager Henry M. Crowther of
the Continental company's Alta properties, went out to camp yesterday to note
the progress of work on the new milling

plant.

W. D. Bogan and P. H. Tallon are down from the Park to take in the fair. Mr. Bogan is still at work upon his Snake Creek properties and says he will continue until he is driven out by the storms of winter. He says he has not yet reached the objective point with the tunnel he is driving, but he is counting upon the coming year to demonstrate the value of his ground.

David D. Erwin, accompanied by W. A.

David D. Erwin, accompanied by W. A. Wilson, the engineer in charge, returned yesterday morning from a trip of inspection to the old Vipont mines, in the northwest corner of the state, which are now being operated by a strong company at the head of which is Mr. Erwin. Returning they went out on the lights side turning they went out on the Idaho side and took in a portion of the northwest. Mr. Erwin will make a visit at Park City before returning to his home in Muskegon, Mich.

WIDE MOVEMENT OF PRIC

HEAVY SELLING OF UNIT STATES STEEL.

Boston. Oct. 5.—Coppers were strong and active today. Amalgamated held above 60 and Bingham advanced on good ties, all day today and the volume of workings under peace with an everted on good in the polarized part of the second of the polarized part of the second of the polarized part of the second of the polarized part o

ously in the late market, but not before a number of independent steel stocks had weakened in sympathy. Trade news to account for the movement was as much lacking as on the advance in the group. The trunk lines were heavy at first, but moved briskly upward later under the leadership of Pennsylvania. Its subsidiary stocks, including the differential lines, lagged in the movement, although a rumor was circulated of a coming increase in the Baltimore & Ohio dividend rate. This was the only apparent ground for the movement in this group. The asserted abandonment of the lead merger plan lped to depress the lead and smelter stocks. Some of the day's rumors as-sociated Erie with St. Paul and Northern Pacific in the supposed plan of settlement of the Northern Securities contest, and were supposed to account May Day Move Up.

The sale of 350 shares of Daly-West at \$13.25 to \$13.75, seller sixty days, can be termed the feature of trading on 'change yesterday. Why the impression prevails that the stock is headed for a lower level is not apparent, unless significance is attached to the fact, that John A. Kirby has severed his connection with the company as general superintended of its properties, and will in future act only in a consulting capacity.

The unprecedented export of copper has been remarked for many weeks, but it was the assigned cause for the strength of Amalgamated Copper stocks today. The day's routine news seemed to be little considered. Attention was given to reports of a large thorn Silver Mining company were chosen to serve another year at the annual meeting on Tuesday. Allan C. Washington, ing on Tuesday. Allan C. Washington, ing on Tuesday. Allan C. Washington, in the sale of 350 shares of Daly-West at \$13.25 to \$13.75, seller sixty days, can be termed the feature of trading on 'change yesterday. Why the impression prevails that the stock is headed for a lower level known geologist and expert, has gone to Bellevue, Ida. accompanied by Mrs. Jenhas been remarked for many weeks, but it was the assigned cause for the strength of Amalgamated Copper stocks today. The day's routine news seemed to be little considered. Attention was given to reports of a large amount of Australian gold to be deposited in San Francisco on Monday for telegraphic transfer to New York. Estimated to the fact, that John A. Kirby has severed his connection with the stocks to day. The day's routine news seemed to be little considered. Attention was given to reports of a large amount of Australian gold to be deposited in San Francisco on Monday for telegraphic transfer to New York. Estimated to the stocks to a strength of Amalgamated Copper has been remarked for many weeks, but it was the assigned cause for the strength of Amalgamated Copper has been remarked for many weeks, but it was the assigned cause for the strength of Amalga for the rise in the Eries. The regular timates as to the amount ran as high as \$7,000,000. But the movement is believed to be in transit to London and due to the advantage of the free transfer across the continent all owed by our treasury balances. St. Paul's final
